Oh spare me today
I've had enough of the hurry hurry
Just let the day rise easy
And take over

We're swimming and I keep going under
Had enough of the fog, sheets, and thunder
Can't we begin being bored and breezy
See our way back into a clearing day

Oh save me today
Help me forget all the worry worry
Just split the sky and free me
To be golden

We're singing now and keep growing younger
Bed in canyons that have beat all our wonder
We can't conduct crack the cold, the crazy
Bring our light for our night
From seeing days

I wept when we parted
And wept when we united
In poverty, my love, we have everything
I wept when we parted
And wept when we united
In poverty, my love, we have everything

Let's go walk in the rain, love
Know our pleasures from pain
In poverty, my love, we have everything
Let's go walk in the rain, love
Know our pleasures from pain
In poverty, my love, we have everything
