Visit "[Tina And Freddy](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Trapped inside a canister to keep me starved  
Decaying 15 years in Rigor Mortis hell.  
This want for brains, slowly gathers my nerves  
The only thing I have, will always make me well!!!

Oh Tina, it's starting all over again.  
I feel it tightening my arms and legs and skin  
Trixions inside the back of my black brain  
It's enough to drive my teenage mind insane!!!

Give me your brains and I'll heal myself  
Only your brains and nothing else  
When you said it was acid rain  
We returned from the grave

In 1969 we lost, but now we're back again  
In 1984 you got us from the sky  
Well now is our time to resurrect from the grave  
And little do you know, I want you skull and what's  
inside  
Give me brains!!!!

Give me your brains and I'll heal myself  
Only your brains and nothing else  
When you said it was acid rain  
We returned from the grave  
Hold me close, in Wee Chapel of the Dawn!!  
We will make love and eat brains all night long!!
