

## Yui Makino "Yume No Tsubasa"

Visit "[Yume No Tsubasa](#)" on [MotoLyrics.com](#)

Far in the light, I can see it  
In every scene of the night  
A tiny feather of love  
I gotta go  
Destiny never finds the way for me, my love  
Even in the night I see your face, in the dark  
So I never lose my way to you  
I never close my heart  
The light is always there

Time goes by, we can never stay the same  
Now we're come so far from love memory  
Though your smile is gone, we will never be apart  
In our hearts we are one, for love melody  
The future arrives with your love

Willing to go to a place  
Where you never need to cry  
I'll take you there

Willing to find an answer  
In all the winding road we have to come through

In the heat of the summer, cold of winter, I'm here  
So you never love your way to me  
Never close your heart  
Your light is always here

Time goes by, we can never stay the same  
In the shades of hope, in love memory  
Though your smile is gone, we will never be apart  
In our hearts we can hear the love melody  
The future still shines, close to you
