We 're all the same  
with different looks  
different names  
voices far away  
I bet you're alone today  
my regards to the talk of the town  
some stay in bed  
while the others are down  
havin' fun of me  
electricity  
Injurious  
so logical  
injenuous  
at the end look at what you've got  
my little girl  
beeing true to you  
but you did things  
other people do  
this is what i found  
other way around  
days are still as they used to be  
but i won't state my philosophy  
such a waste of time  
silence will be fine
