Can't stand being lonely
don't even know you're near
Lost in the city nights

I can't trust anybody
I can't tell my friends about it
I don't have the nerve to break up
I don't have the nerve to make up

I'm not your grand solution
I'm a glitch in evolution
I'm a man and as I'm moving
I don't know what the right is doing
Was it something I did?
Can't make friends with anybody

I'm lost again
I'm lost again in the city night (Lost in the city night)
I'm lost again
I'm lost again in the city night (lost in the city night)

This is too much to swallow
Pray my heart and mind will follow
The trick is not mind
and people going mad around you

I'm not your grand solution
I'm a glitch in evolution
Trying so hard to be seem
but everybody passes by me

I'm lost again
I'm lost again in the city night (Lost in the city night)
I'm lost again
I'm lost again in the city night (lost in the city night)

Hold me baby
Hold me tight
and I'll stay with you
Stay by your side
And hopefully I'll make this right

I'm lost again in the city night

Can't stand being lonely
don't even know you're near
Lost in the city nights

I'm lost again
I'm lost again in the city night (Lost in the city night)
I'm lost again
I'm lost again in the city night (lost in the city night)

Hold me baby
Hold me tight
and I'll stay with you
Stay by your side
And hopefully I'll make this right
I'm lost again in the city night (lost in the city night)

I'm lost again
I'm lost again in the city night (Lost in the city night)
I'm lost again
I'm lost again in the city night (lost in the city night)
