When they find you naked  
With strings around you  
Then maybe they will laugh  
When they find you naked  
With strings around you  
Then maybe they will laugh  
When they find me naked  
With strings around me  
Then maybe they will laugh  
And when they find me silent  
Deformed and wired  
Maybe they will laugh  
When they find us twisted  
With strings around us  
Then maybe we will bleed  
When they find us laughing  
They might adore us  
And then maybe we will bleed  
Then maybe I will bleed...
