What's in your imagination?
Somewhere there's a living creation
Waiting to speak to the nation
Whether it's politics or computer animation
It can better world relations
Starting with a station
Soaring with floatation
Tryin' to recieve appreciation
And further it's application
Don't take a day off or vacation
Full of affirmation
But also asperation
Covers the corrupted with persperation
This ideas older than claymation
But it's still takin' action
It's easier than multiplication
And simpler than division
It's seen in every vision
And told in every premonition
Thought of in precognition
It's got no complication
This idea has one interpretation
It's love
