What's in your imagination?
Somewhere there's a living creation
Waiting to speak to the nation
Whether it's politics or computer animation
It can better world relations
Starting with a station

Scarting with floatation

Soaring with floatation

Tryin' to recieve appreciation

And further it's application

Don't take a day off or vacation

Full of affirmation

But also asperation

Covers the corrupted with persperation

This ideas older than claymation

But it's still takin' action

It's easier than multiplication

And simpler than division

It's seen in every vision

And told in every premonition

Thought of in precognition

It's got no complication

This idea has one interpretation

It's love
