Tried to find you, waited for you
In the wrong place, sorry I spaced
Make it up to you, the least that I can do
Tomorrow will be better
Tomorrow will be better

Got your voicemail, from a jail cell
Tried to find you, already made bail
Make it up to you, the least that I can do
Tomorrow will be better
Tomorrow will be better than what's left of today

Pass me by, let today just fade away
Pass me by, just fade away

Tried to find you, waited for you
In the wrong place, sorry I spaced
Make it up to you, the least that I can do
Tomorrow will be better
Tomorrow will be better than what's left of today

Pass me by, let today just fade away
Pass me by, just fade away

I fade away (repeat, fade)
