"The Other Way"

Visit "[The Other Way](#)" on MotoLyrics.com

Drove in broken cars and chased the stars
Pointed guns and stared into the sun

When I looked the other way, when I looked the other
way
When I looked around and I found you

Night flight that's right silver clouds above
All alone I hardened into stone

When I looked the other way, when I looked the other
way
When I looked around and I found you

I didn't know know when I caught your eye
Would I love you, or just chase you away?

Hotel hookup mirrors off the wall
Red light bail out filled with dread and doubt

When I looked the other way, when I looked the other
way
When I looked around...

When I looked the other way, when I looked the other
way
When I looked around and I found you
Found you, I found you, found you
