Hey you, wrapped in a blanket of solitude
Alone but never being lonely, just trying to get through
You know I've seen it all before, the shades of gray
before you float away

When you come with me, you're just a mystery
You're my enigma, you're like a cloud

Hey you, where do you think you're going to?
Always leaving when the sun goes down, or when the
sky turns blue
Welcome to my mind, the vapor trails that clutter up the
sky

When you come with me, you're just a mystery
You're my enigma, you're like a cloud, you're like a
cloud

Hey you, this is a song I wrote for you
A familiar silhouette to see, mirror shadow looks like
me
Everything is what it seems, just another dream

When you come with me, you're just a mystery
You're my enigma, you're like a cloud, you're like a
cloud,
You're like a cloud, you're like a cloud
