Box Of Secrets

A little bird once said to me
You've got to live a little before you're happy
And if you take a lot
You'll be left with none
I had to learn a bit and live a bit
And let it all sink in a bit

A little voice there in my head
Saying how many hours has your day got left
With the pressures of your day run out of time
Hard to have a plan and keep to it
And pick a path and stick to it

(Can't you can't you...)
Can't you show me
(I'll be I'll be...)
I'll be waiting to see
(Wanna learn wanna learn...)
Oh, the secrets of the universe
(Can't you can't you)
Can't you can't you make it clear to me

Chorus:
Open up the box of secrets
Take one out for me
I'll show the number on my ticket
And take one home with me
Show me show me what you got
I'll take it take it soak it up
Open up the box of secrets
Take one out for me

A little bird once talked to me
Oh but then he flew away too quickly
Didn't have enough time to ask the things I need
He said I got to make my own mistakes

Find the lessons I can take

Why'd all the answers hide away

When we need a little guidance through the day
If I can stay afloat with my arm bands off
Then I can just keep going laugh the bad days off

(Can't you can't you...)
Can't you show me
(I'll be I'll be...)
I'll be waiting to see
(Wanna learn wanna learn...)
Oh, the secrets of the universe
(Can't you can't you)
Can't you can't you make it clear to me

Chorus

Rap:

I'm gonna break the locks and open up the box
Cos I was out in the cold searching kinda lost
I noticed I was hopeless but now I'm focused
I wrote this cos I let go but now I hold this
Now I'm on to bigger things and better things
And now I'm figuring the world and I'm settling
If this is the right path I'm stepping in
Nothing but positive energy I'm letting in
I gotta let go of everything I fear now
I've gotta let go of everything, I'm here now
And I'm a girl with a plan, right here where I stand,
I've got the world in my hands

Chorus x 2
