

## Zarif "Over"

Visit "[Over](#)" on MotoLyrics.com

Well there was something in the way  
You used to look out of your window and say  
As the rain would drizzle down  
You'd say there's got to be a better way  
A look beginning in your eye  
Drown out the other thoughts in front of you  
And I'd fade back into your mind  
As you'd be looking out ahead of you

Something needed  
In your empty world I wish I could complete it  
But the gaps that grew they can't just be deleted  
If there's something then I wish I could suggest it  
To you for you

It's over  
Your time with me is over  
You're looking past my shoulder  
I know you think there's more for you  
Oh I told ya  
I wasn't quite how you were  
So I'm the first to say it's over, over, over

Well take a step and slide it back  
I'll get out of your immediate space  
I wish that I could be enough for you  
To try and put a real smile on your face  
I guess I'm not the way you like  
I could try and be as clever and impressive as I can  
But it don't matter how I try  
There's something else that you've created in your  
mind you wanna  
have

Something needed  
In your empty world I wish I could complete it

But the gaps that grew they can't just be deleted  
If there's something then I wish I could suggest it  
To you for you

Time invested

So we can say that it was tried and it was tested  
I know with me you really tried to do your bestest  
But I don't want you just pretending anymore  
To me for me

It's over  
Your time with me is over  
You're looking past my shoulder  
I know you think there's more for you  
Oh I told ya  
I wasn't quite how you were  
So I'm the first to say it's over, over, over

I tried to tell you but you were trying to be nice  
But I recognise too well the faraway look in your eyes  
I tried to help you to find the things you crave,  
I know you love me  
But I love you enough to say

It's over  
Your time with me is over  
You're looking past my shoulder  
I know you think there's more for you  
Oh I told ya  
I wasn't quite how you were  
So I'm the first to say it's over, over, over

Baby let me go then you'll be free  
And I'll be there to watch you quietly  
I know that you'll be better off without me, without me
