I could've fallen in love but you (x2)

I could've fallen in love but I fell apart  
You could've told me your name but you...  
I wanna stay naive but I know too much  
Tomorrow is the 18th so you can take my youth away

I get the feeling that we're still together  
Running away from everything that matters  
You could be my star or my bad karma  
You could be the knife that you stab me with again and  
again

(Chorus)  
X you up in my love  
And you can x me up in yours

Everyday I see your face  
Wanna hear you say my name

I could've fallen in love but you broke my heart  
So I took your ego and fed it to the dog  
Be my lover  
Be my x lover

Take it break it steal it crush it drop it  
Break it crush it take it drop it drop it  
Steal it take it crush it take it take it  
Break it break it drop it crush itstab it

Yeah!  
Yeah!
