Evangelina

Sleep with him evangelina  
When you see the clouds turn cold  
Stay with child evangelina  
You can never banish this unborn soul

He has seen the moon light going through you  
He has heard the whispers of screptula  
Mana won't be blinded from the luna  
Who will you be crying for evangelina ?  
Your lost with out your own directions

Got lost within your own deceptions  
Where do you go from here?  
Your stuck here somewhere in between  
Where is your magic evangelina?

In the dead of the night I hear you calling sleep  
I can feel phalasia's baby hear inside me  
wake with him strange evangelina  
Just once let me celebrate inside you  
Just once let me feel this life inside you

Sleep with him evangelina  
So I can feel his heart beat strumming  
sleep with him evangeline  
cause you wont hear your baby crying  
sleep with him evagelina

let yourlelf love your pagan baby  
let yourself love your pagan baby
