"Moon"

Visit "[Moon](#)" on MotoLyrics.com

Hey moon, baby don't be so mean
Beggin' u tell me where she's weepin'
I know u've been watchin' everythin' on the globe
Since we've been created for seekin' the love

Hey moon, I wonder why u so quiet?
Even now the world's goin' under to an end
If you would've been a mirror to reflect what we do
Then maybe we could've avoided

Ima onaji tsuki wo miteru
Sekai ga moeteku shizuka na yoru ni

Hey moon, I bet u'll be shinnin' up there
All through the nights over a million years
Even after we all human disappear from here
This planet's history into thin air

I know nothing could ever stay in forever
Like the sun and u moon can never get closer ever

Ima ni mo nakidashisou na kumo ni notte
Kasunda yozora wo tonde iketa nara

Hey moon, am I wrong? I still believe in
Our prayers ain't goin' although all beings fleetin'
Now in a silent night, the world is bleedin'
I'm singin' not knowing where she is weepin'
