You must close your eyes, you can see  
Once you break your arms, you can touch  
Once you cut your legs, you can fly  
Once you kill your breath, you can feel yourself

Who blindfolds your eyes, is you  
Who straps up your wings, is you  
Who drags down your legs, is you  
Who rules out your dreams, is also you

Everything that's chaining you comes from your own  
inner world

Break yourself free from your mind  
Liberate your feet from the mind  
Once get you released, from the universe

Tonight

Break yourself free from your mind  
Liberate your feet from the mind  
Once get you released, from the universe

Now open your eyes, you are in nowhere
