Lonely whispers in the dark
And she doesn't even know her part
They do not know that I've come for them
What lies ahead must come again
Lonely whispers in the dark

Chorus:

I do not understand your face
Why do you come around this place
Let's leave the world behind again,
A million miles with you, my friend
Lonely whispers in the dark

Lonely whispers in the dark
She's going to listen to her heart
They cannot tell what I feel for her
But that doesn't matter, anymore
Lonely whispers in the dark

Chorus

Lonely whispers in the dark
She stands alone in the park
They do not see her standing there
They do not know, she, does not care
Lonely whispers in the dark

Chorus
