"Generation"

Visit "[Generation](#)" on MotoLyrics.com

Many generations have passed away
Fighting for the same cause, we fight for today
Now some people say, "When will it happen?"
And that's what they say
Now let us tell them something

My generation will make the change
When Hafe bring it come
This generation will make the change

How could I dream, that this will go on?
For more many years, until a kid become a man
Fighting for freedom, oh it's a deadly thing
And trying to get away from reality
Is dangerous

My generation will make the change
Sing along
This generation will make the change

Some man lose faith, too long ina the struggle
Oh no we can't lose faith, we born ina the struggle
Like they say we were born in sin, well
Young blood ina the struggle

Yes my blood is fresh, ooh
Young blood ina the struggle
Young blood ina the struggle

Young blood ina the struggle, uh
Young blood ina the struggle
Young blood ina the struggle

Now is the time
No more talk and play
Wake up lazy mind
Aye, no sleep for you today

Now youth responsible
A when all else have failed
And there will be no more
Blaming someone else

My generation will make the change
I'm so glad to see
This generation will make the change
Hard as it may be

My generation will make the change
This ain't no talk no cheap
This generation will make the change
This ain't no weep, no weep

My generation will make the change
(This generation, sin)
This generation will make the change
(I mean this generation, oh)

My generation will make the change
This generation will make the change
My generation will make the change
