"Eye on Your Back"

Visit "[Eye on Your Back](#)" on MotoLyrics.com

I have an eye on your back, so
No need to run against me
Don't fight against me, you, you don't want me to be
close anymore
Not anymore, you get around
So let me heal you, cure you, heal you
I will never need to wish to be part of me
What you call your future
No, see me interfere, watch me being your fear
You get bored, bored, I'm waiting for the last breath
I'm waiting for the last breath, for the last breath
I'm with you, you'd better learn to deal with me
Coming closer when refusing what I am
I'm with you, I'm with you, I come along with you
You'd better learn to deal with me
Coming closer when refusing what I am
I come along with you
With you, see how long you can hold you breath now
Let me see, determine wrong from right - you're forced
Into a shaking world - you're plunged
See me interfere, watch me being your fear, feel me
interfere
I'm with you, you'd better learn to deal with me
Coming closer when refusing what I am
I'm with you, I'm with you
I come along with you
You'd better learn to deal with me
Coming closer when refusing what I am
I come along with you
Before your heart stand still, and leaves you breathless
Leave your fears away
Before your heart stand still
Leave your fears away, away, fear will touch you
anyway
Before you're connected, in touch, before becoming
one of them
(Just) Remember you were about to cut the links
As you were about to get out, you suddenly asked for
more
I, I have an eye on your back, so
No need to run against me, don't fight against me, you

You don't want me to be close anymore
Not anymore, you get bored, before becoming one of
them
Remember you weer about to cut the links
Before you're connected, before becoming one of
those that failed
I'm with you, you'd better learn to deal with me
Coming closer when refusing what I am
I'm with you, I'm with you
I come along with you
You'd better learn to deal with me
Coming closer when refusing what I am
I come along with you, before your heart stand still
And leaves you breathless
Leave your fears away
Before your heart stand still, leave your fears away
Before your heart stand still
Leave your fears away, before your heart stand still
Leave your fears away
