

Mnemonic

"Valves"

Visit "[Valves](#)" on MotoLyrics.com

The stench of poison in the heat reflects
My sweet crystal myth
One day bleeds into the next

Into the next

When will the corrosion of emotion
Will happen this time
Can you feel it dropping?
In the depths of a comet's stomach
I travel with this hollow vessel

Spirals and shadows dancing in front
I relapse and inhale the dust

Well it's all just an organic illusion
You know what makes us breathe
Makes our heart beat
In the valve of the heart

You know it makes me bleed
I just meant you're alive

Spirals and shadows dancing in front
I relapse and inhale the dust

Somewhere somehow
Somewhere somehow

Spirals and shadows dancing in front
I relapse and inhale the dust
