Running and laughing and dancing around  
Enjoying the birds and the fruit on the ground  
They're lighting the fire and drinking good wine for  
their faith

The nightmare of darkness was yesterday burnt  
They opened new chapters and started to learn  
How people can live under pressure and trust in  
religion

We took these golden ways  
Researched from older days  
We held the flag of life  
A brand that all survived

Wherever the journey will take us at all  
We're watching the sky, we'll wait for the call  
The pilot of mankind will show us an alley of hope

We're stronger than ever with future in mind  
The power of inside will help human kind  
The fire of life is much hotter than fighting the devil

We ran this holy race  
We found a light in space  
We held the flag of life  
A brand that all survived

We took these golden ways  
Researched from older days  
We held the flag of life  
A brand that all survived
