Visionary, come and save my sanctuary
Leaving out who'd start without you

Because they really don't care
They never have a minute to spare

Every person does their deeds to make it worsen
Just 'cause everyone might, it doesn't make them all
right

When will I be wrong, or when will I belong
Whenever we're gone
When'll somebody say we've got to change today
Or together we all shall fall
Two wrongs don't make two rights at all

Institution is the dawn of retribution
Start the wave to start to save you
Because you really should care
Before you win a ticket to nowhere

Some will meet it, others destined to repeat it
Just 'cause we're on the line, it doesn't mean we're on
time
And it will never be fine...

When will I be wrong, or when will I belong
Whenever we're gone
When'll somebody say we've got to change today
Or together we all shall fall
Two wrongs don't make two rights at all

Summer day and we're together
Autumn day no better weather
If we fail in our endeavor
Winter day will be forever
Summer day and we're together
Autumn day no better weather
If we fail in our endeavor
Winter day will never go away
