So you tell me that your broken inside
That your gonna die settle down girl
I see the fear In your eyes
cause your fear is fear is mine
then you tell me theres a cancer in your mind
and you say that your running out of time
get though the night
im right by your side
dry those tears away
(Chorus) Hope is closer than you know
you gotta open your eyes
and open your mind
to see that life is more
than who we are
you gotta open your
eyes and focus on the light.

All the clouds are moving faster in the sky
and all the stars are getting darker
girl I know the pain In your eyes
cause your pain is mine
i guess you never really know until you realize
that your reflection is so
precious that I'm spinning girl I'd give you mine
If you could stay here tonight
(Chorus)
a thousand years can pass me by
your memory will never die
but I still don't understand it
how he could take your life (Solo)
(Chorus)
