

Aegaeon "Inception"

Visit "[Inception](#)" on MotoLyrics.com

A failing race desperately activating a project with
unknown results

The inception of a destructive master-creature
Diseased minds of a corrupt civilization poisoned by
fear

Radical measures are taken for salvation What once
were of the greatest minds
Became the architects

Cataclysm of an unfamiliar specimen combined with
synthetic elements

This creation is abomination

Their hunger is multiplying and life is depleting
This is the end complete decimation cessation is
commencing

The slate is wiped clean a total abomination
Of every living organism...
