

Agony "Cyberpsychosis"

Visit "[Cyberpsychosis](#)" on MotoLyrics.com

A synthetic human race is born,
The new generation!
Human values are digitized,
Our pathetic future is now arrived!
Cyberspace to replace human perception,
Reflex boost with speed potion!

Need a delay fix to stay alive
Human clones are functional!

Cloning everything that lives,
BETRAYING!
Try to overcome our natural,
DEATH!
Chemical madness we built a,
MACHINE!

Abnegation of the primitives,
ROOTS!

A screen to see!
A transistor to think!

A synthetic human race is born,
Another kind of revolution!
At the age of the nanosecond!

Misfunction of the creation,
I never expect to live this way!

Welcome on earth,
Where the second millenium as begun,
They thought they could do that,
Make machine thinks!
