We've seen better days
Better days than this
And look at what we've left behind
It's nothing we will miss

And all the steps that I retraced
I tried to go back and erase
But I'm standing here alone

Then it's like I spoke to You
Then it's like You spoke to me

If God is love, and God is here
Love is here, love is here
It's exactly what we waited for
It's exactly what we needed
Love is here, Love is here

Now it's simpler than I thought
And all the late nights that we fought
Were useless but I'm okay now

You made me a promise
And I'm calling You out
You promised me You wouldn't let me down
