Convictions as strong as they are it's over when I  
exhale

Could I sing if know one heard me?

Would I pray if no one asked me to?

Could I love if no one loved?

We fly, we fly on the wings of love tonight

On the wings of love tonight

To know that You're still in control

And I'm right where I belong

I've been here along

On the wings of love

How can I fly when I wasn't given wings

All You gave me was fear of heights

But if something doesn't change now

If things keep going on this way

I'll run away
