Why should I give a fuck about Elvis
Like I give a fuck about Vietnam
Why should I give a fuck about JFK
Or give a fuck about who I am
Why should I give a fuck about justice
When the police are thieves in the streets
Why should I give a fuck about voting
When I can do it with my feet

I've never been more paranoid that right now
Never been more paranoid or have I?
I've never been more paranoid that right now
Never been more paranoid or have I?

Winners and other losers
To all the shakers and movers
Winners and other users
To all the substance abusers
It's the curse that refreshes you

Why should I give a fuck about Castro
Like I give a fuck about chairman Mao
Why should I give a fuck about the past
Like I give a fuck about the future fight now
Why should I give a fuck about religion
If Jesus walked no water why didn't he fly
Why should I give a fuck about living
If I know one day I'm gonna die

I've never been more paranoid that right now
Never been more paranoid or have I?
I've never been more paranoid that right now
Never been more paranoid or have I?

Winners and other losers
To all the shakers and movers
Winners and other users
To all the substance abusers
It's the curse that refreshes you

I've never been more paranoid that right now

Never been more paranoid or have I?
I've never been more paranoid that right now
Never been more paranoid or have I?

Winners and other losers
To all the shakers and movers
Winners and other users
To all the substance abusers
Winners and other losers
To all the shakers and movers
Winners and other users
To all the substance abusers
It's the curse that refreshes you

Lets go and burn down the fucking world
Lets go and burn down the fucking world
