I don't want to fall asleep  
Soon you'll be far away from me  
I'll make the most of what is left  
This will be a night we won't forget

Daylight don't get up this morning  
Can't you see I'm stalling  
For a little time  
Sunrise stay out of my window  
Don't become tomorrow  
The night is still mine  
Day light don't shine

I won't let you see me cry  
I'll hold your heart until you say goodbye  
Do what you have to do  
I hope that you come back this way real soon

Don't Shine  
Take the dawn out of your day  
Don't Shine  
Keep it dark and she might stay  
Don't Shine  
Hide behind those clouds keep her from
