I don't need to be treated this way no more
Your all I've got but you make me feel so small
Don't you know I believe I feel your out of phase
And it shows and it shows

Your on a frequency I know
Where the picture comes and goes
The static in my head
are the words that you once said
And your waves come crashing in
The cycle starts again
In spite of what goes wrong
You're the frequency I'm on
Electric pulse in a way I can't explain
I feel so close yet I'm so far away
And it shows and it shows

Alone alone

And it shows and it shows
