You push your pills you push me and I push you back
Take your candy I have no use you like the abuse You
stay in your hell in your shell. Break out and wake up. I
know you never sleep...don't we all have insomnia. Self
medicated, Inebriated...joking like a fool. I saw the fire
in your heart...all that's left you in the dark, Are there
any embers left in you? I wanna shake you and wake
you I wanna make you believe...believe in me Make you
see me. Broken hearts will have their way, broken
hearts will have their say. Self medicate, inebriate.
Keep it numb until the night comes. I saw the fire in
your heart all that's left you in the dark. Broken hearts
will make their way...broken hearts will go away...go
away.
