summer night, the worlds on fire  
i don't ask why but i think i know  
heart attack a few years back  
now just a weak arm  
well it's a miracle

and whispers of doubt that escaped our mouth  
the first of an army to come

I think that we know there are plans for us all  
just not the ones we're making for ourselves  
and I want to believe, cause my father believed  
well, if the raptures not coming I don't know what i'll do

we fell asleep to static tv  
the church of what'd you do last night?  
spinning in Orion's arms  
the church of mostly empty space

long before the earth was born?  
well that's why they call it faith!

and whispers of doubt that escaped our mouth  
the first of an army to come  
and if you fall asleep to static on TV  
the hem and haw of the end
