Art of war, art of existence  
Destruction of civilizations belongings...

Deformed of value and moral principles exterminate  
overpopulated lands, the arms race,  
Greedy heads, political dispute different states, hostile  
blood, homeland glory,  
Pried and honour in all of us.

...War art, dark side of mankind  
Animal craving of blood, shoot murder insanity and  
anger,  
...In all of us.

War versus governments and importunity expansion of  
imperialistic nation,  
Versus promoted culture and religions, war art..  
...Existence way to freedom.
