Human ignorance summons the apocalypse  
Hungry scavengers bespeak A total chaos  
Mountains explode, flames are burning  
The beast is awake

Full of hatred it's coming for us  
Beware of the hellfire  
Strokes of lightning hit the Earth  
Nature is dying, we're fighting in vain

We are damned

It's eyes are bloodthirsty  
Our mind is benighted  
It's smiling so blithely  
We are damned

Welcome - To - Hell

Winds are embracing the Earth  
Oceans are rising, rivers are flooding  
Plague strikes and flames keep burning  
Bow to the beasts from Hell

Nothing remained  
But the smell of rotting flesh  
And if life returns to this place  
The process will start again
