"Final Journey"

Visit "[Final Journey](#)" on MotoLyrics.com

a loneli winter night
your time has come to go
to travel to the other side
the stars will guide your way
farewell my love
one day I hope we'll meet again

in my mind you will forever stay
our time together was the best time of my live
the things we've reached together

I will never reach again
you're gone much too early
I would wish that you could stay

I want to die!

now you're gone and I have lost my will to live
I miss your warmth
I will follow you
on your final journey
