(Larry Cheshier - Dan Mitchell)

We were sittin' in a bar downtown just the other night
We's a havin' a drink and havin' a time a really feelin'
right

When this fancy dude started puttin' down our music
and our boots

Well we just had to set him straight when he started
puttin' down our roots.

We said get off a my case get outta my face leave
these good ole boys alone

When you start puttin' down country you're puttin' down
home sweet home

Better let it slide and a run and a hide or son we're
gonna get it on

Get off a my case get outta my face leave these good
ole boys alone.

Well, now we were drivin' down the road late one
afternoon

The radio was a playin' loud an old Hank Williams tune
When this wise guy pulled up beside us in a big long
Cadillac

When he yelled turn down that noise we both hollered
back.

We said get off a my case get outta my face leave
these good ole boys alone

When you start puttin' down country you're puttin' down
home sweet home

Better let it slide and a run and a hide or son we're
gonna get it on

Get off a my case get outta my face leave these good
ole boys alone.

--- Instrumental ---

Now we were playin' in a high-class club with crystal
chandeliers

In between a song we asked the crowd what they'd like

to hear
When some guy in a tux and a tie said our music was
uncouth
We just turned our mikes up loud and then we both cut
loose.

We said get off a my case get outta my face leave
these good ole boys alone
When you start puttin' down country you're puttin' down
home sweet home
Better let it slide and a run and a hide or son we're
gonna get it on
Get off a my case get outta my face leave these good
ole boys alone.

Get off a my case get outta my face leave these good
ole boys alone...
