I just came by and wondered if you'd talk to me
I know I shattered everything we planned
And I've been chasin' dreams of what I thought was
happiness
When all the time I had the whole world in my hands.

Loving you was all I ever needed
It's a bridge I never meant to burn
Loving you was all I ever needed
A lesson that took losing you to learn.

--- Instrumental ---

I just thought you'd like to know how much I missed you
I hope it's not too late for me to say
Your love was everything I always wanted
I'm sorry now I let it slip away.

Loving you was all I ever needed
It's a bridge I never meant to burn
Loving you was all I ever needed
A lesson that took losing you to learn...
