don't stay

don't like where you stand then move

don't like being here then choose

to leave this place just walk away

don't like where you are don't stay

don't stay

don't stay

don't stay

don't stay

don't stay

don't stay

complain about the friends you've got

don't like them then why not

just move ahead and don't look back

away from the problem you attract

don't stay

don't stay

don't stay
