Who better than me
Fall into be seen
Draw fire and then
Pray quiet
I'm too low
Stay down stay down
Cold earth to the ground
Too late to be
So real but
I'm too low now
And if I ever wanted you back to me
Too low now
And if I ever wanted you back to me
Too low low
Spread gently for me
Too hard to be heard
With better words I'm better than
Too low low
Stay on stay on
Too late to be gone
With better words I'm better than
Too low low
And if I ever wanted you back to me
Too low now
And if I ever wanted you back to me
Too low low
