She goes down like rain
She goes down the hard way
Spilling herself on your body

I wonder where you are tonight

Just outside the dark
She waits by the highway
Hopin to go
But her mind just stays

I wonder where you are tonight

Ease into you ease into me
Fell from the places
Left to believe
All from the time
And time is what for
Redress the weight
And bury the world
Time will save
You come what may

She goes down like rain
She goes down the hard way
Trying ot run
But her mind just stays

I wonder where you are tonight
