

Beneath Starlit Skylines "Arcadia"

Visit "[Arcadia](#)" on MotoLyrics.com

Somewhere above the city, slightly below the stars
There's a place you'll find called Arcadia
Where the ocean collides with the crimson skies
And the mountains touch the clouds
Never-ending waterfalls, and glowing trees
Ten-thousand stars lighting up the sky

Welcome to Arcadia; where dreams come true
You fall in love with someone and they fall in love with
you

An oceanic adventure towards the edge of the earth
an endless night under a diamond sky
An oceanic adventure towards the edge of the earth
an endless night under a diamond sky

Arcadia x4

A charming synergy of day and night
A beautiful hybrid of dark and light
A charming synergy of day and night
A beautiful hybrid of dark and light

Welcome to Arcadia; where dreams come true
You fall in love with someone and they fall in love with
you
