Never Let Go

I tried to fill this emptiness inside of me
Unbearable pain, although I try, won't hide from me
They're telling me, you've found someone to keep
you warm
Pretending not to hear
But it is plain to see
How happy I would be
You're not with him, but still with me
It's time that I should face someone took my place

Chorus:

I should've never let you go (I let you go)
You're right and I was wrong
I should've never let you go (I let you go)
Once we were, once we were one
