"Never Let You Go"

Visit "[Never Let You Go](#)" on MotoLyrics.com

I Tried to fill this emptiness inside of me
unbearable pain, although I try, won't hide from me
They're telling me, you've found someone to keep you
warm

Pretending not to hear,
but it is plain to see.

How happy I would be

You're not with him but still with me

It's time that I should face, someone took my place

Chorus:

I should've never let you go (I let you go)

You're right and I was wrong

I should've never let you go (I let you go)

Once we were, once we were one

I try to tell myself it would be just like before

Touching, you, loving you, always wanting more

You're telling me you're so in love with someone you've
just met

Hey, I don't care I'm already over you already over you

How happy he must be

'cause You're with him and not with me

It's time that I should face, someone took my place.

Chorus

Don't you that don't you know

I'll never let you go (don't go)
