In days gone by we chose our side  
Showed them we weren't afraid to step over the line  
Standing fall we would look you in the eye  
Cause what we hold true you could never deny  
You don't understand what we chose to condemn  
You're the one who has made it us against them  
Our hearts turn black and our blood runs cold  
When we see our country being bought and sold

With eyes of fire we see things today  
You could never change us cause it's our way  
With eyes of fire we see things today  
You could never stop us it's too late

Long ago we learned it's our fight  
To try to bring out what they hide from our sight  
To show them they have not won our hearts and minds  
With their pledges, promises, and campaign lies  
With eyes of fire we see what we see  
For this country, what it is, and should be  
Where an honest man can get ahead and not just by  
And say he loves his country with his head held high
