There's six of them and only one of me  
My back's against the wall and only one good knee  
Well here they come and they're closing fast  
I better get if I'm going to last  
A fight on the street and who's to blame  
Working my way through society's game

So I live the way I want, it's got to be a crime  
You screwed up your life, now you fuck with mine  
The good luck in my life will never stay  
Nothing I can do to change my fate  
This boredom is driving me insane  
I look around and who's to blame  
Watching my friends drown in fear  
There's nothing left nothing here  
Six of them  
And only one of me
