Hell hound, hell bound hot on ya trail
And hungry for the sound of ya cryin'
Cold shivers in the black said, "I'll light the match"
I'm burnin' hot like ya thermostats

Overdose when I push up inside, ride on a bed of fire
Baby I can take you higher
I like the way you cut me, I like the way you fuck me
I like the way ya tie me up, I hope you like it rough

And you will fly with me, you'll get high with me
You'll lay down with me, you'll cry out loud with me
And you will fly with me, you'll get high with me
You'll lay down with me, you'll cry out loud with me

Again cold chills up and down your spine
Don't mind when I come from behind
I see you laid back in ecstasy as I eat you alive
And hit it like a landmine

Oh woman you're so fine, fine, fine and you're all mine
I want to tease you, I want to please you
I want to burn you and I want to bleed you
And you will fly with me, you'll get high with me

You'll lay down with me, you'll cry out loud with me
And you will fly with me, you'll get high with me
You'll lay down with me, you'll cry out loud with me
I will invade your senses, I'll see you in your dreams

Hold out your arms so I can break you at the seams
My little lover, undercover, you shiver and shake
And quake and break like no other little lover yeah little
lover
Shiver and shake and quake, shiver and shake and
quake and break
