no one was coming to my aid  
and i still was so afraid  
of the loneliness inside that id run away and hide  
tell you the truth for me it would have been the end  
lucky for me i had a friend  
what i was lookin for was you so help me true  
how could i know what it could do  
through the rain storm (through the rain)

cross the mountain (cross the plain)  
walkin' with you i feel so strong  
cause you helped me carry on  
with you guidin' (you to guide)  
i no learning' (i can't hide)  
we are much more than you and me  
we are the best we both can be  
we are the best we both can be
