"Blue"

Visit "[Blue](#)" on MotoLyrics.com

There is a world of difference, you've got someone to
grow on
Don't think the sun won't notice your shade's under my
shadow
Get your heart back here and try this
Unsyncopated visionsries won't buy this

You've got me wrapped up in blue
That's how the sky will do and I've been down before
You've got the sunset in your eyes
This comes as no surprise and I've been down before

You think our hearts are ready to push the limits of the
sky
I think the wind will blow us out of proportion
Get your heart back here and try this
Unsyncopated visionsries won't buy this

You've got me wrapped up in blue
That's how the sky will do and I've been down before
You've got the sunset in your eyes
This comes as no surprise and I've been down before

There is a world of difference
You've got someone to grow on
Ohhhh ohhhh.....

Get your heart back here and try this
Unsyncopated visionsries won't buy this

You've got me wrapped up in blue
That's how the sky will do and I've been down before
You've got the sunset in your eyes
This comes as no surprise and I've been down before
