When things get bad,

I fall on the floor.

The guilt I have

Shall be no more.

And it kills me still today, it kills me still today.

When I get lost,

I burn my map.

(?)

Just endless traps!

And it hurts me still today, it hurts me still today.

And we are changed,

And we are changed.

When I get sick

The doctor is here

(?)

The more I fear

And it kills me still today, it kills me still today!

And we are changed,

And we are changed.

And we are not the same!

And we are saved!

So live like it, live like it!
